Most vulnerable:

- *limited land spaces*

- *limited financial and human resources*

- *Our lifestyle depend on the sea and land resources, but these are in the front of CC Impacts*

By: Roseo Marquez

We contribute less than 1% of greenhouse of gas emissions, yet we pay the price

When the normal becomes abnormal

Coconut Palms - inundated

Sea Level Rise or Tectonics

Climate Change Campaign in the Most Developed Countries

Commitment by our Leaders

The Micronesia Challenge (MC) was signed by Micronesian leaders, to effectively conserve 30% of near shore marine resources and 20% of forest resources by 2020. The signing of the MC is a giant step to build our resilience to the effects of climate change.

We are calling on everyone to assist most vulnerable nations by pushing for adaptation funds

Thank you!!
